

transcription

Transcription with a 99% accuracy rate, a quick turnaround and low cost per record* (*for name, address, city, state and zip*).

Wessan Interactive transcribes voice information and provides real-time address error correction using our WebTrans © Data Entry System, USPS verification and CASS™ certification.

The Quality

Because of the quality controls we have in place, Wessan Interactive provides one of the highest levels of transcribing accuracy in the industry – 99%.

The Turnaround

Wessan Interactive transcribes and delivers data to its clients within 48 hours after receiving sound files. In some cases (depending on the project), the amount of time for delivery may be much shorter.

The Features

In addition to providing standard transcription (name, address, etc.), Wessan also provides open-ended transcription documenting data such as opinions, comments and explanations.

The Deliverable

All transcribed data is compiled into your preferred database format and delivered electronically via the web using a secure FTP, an email or any other method you choose.

Common Transcription Applications:

Capture names and addresses, collect responses or gather detailed caller data for....

- Seminars
- Contests
- Quizzes
