

web dev & hosting

An interactive web infrastructure with a secure, fault-tolerant server environment and a 99.9% uptime availability.

Wessan provides robust, interactive web development, as well as on-premise site hosting, on a secure, fault-tolerant server environment.

99.9% Uptime/Availability

With our redundant, large bandwidth internet connection, and tier III data center, we offer both uninterrupted service (99.9% uptime) and sufficient capacity for maximum public access to any site.

Common Database with IVR Many of the websites we develop share a collaborative database with an IVR or Voice Messaging application allowing us to display information or manage promotions and sweepstakes, regardless of method of entry.

Real-time Reporting

Wessan is uniquely qualified to handle your data collection and management. Whether we host your entire site or simply handle your Registration or Entry Form page, we will securely and confidentially manage all of your program's data providing you with real-time reporting.
